

## **Client Spotlight**

# TYTRE

The United States Department of the Interior has purchased the second order of a new generation Led solar street lights from a local Las Vegas company, **Tytre, Inc.**

**Tytre** is the leading provider of outdoor solar street lighting for the State of Nevada. "With installations at the Las Vegas Convention Center and Lake

Mead National Park, and ongoing negotiations with several municipalities, the future looks bright for **Tytre**," remarked Curtis McCall, company founder and president.

Principals from the National Park Service at Lake Mead noted that the necessity for near zero maintenance was the deciding factor in their solar lighting purchase from **Tytre**. Staff members went on to say that competing devices were eliminated in favor of

**Tytre's**, based on ease of maintenance. Park Service maintenance staff has avoided the nightmare of replacement parts from

multiple manufacturers by installing the **Tytre/SolarPath** fixtures.
